

Klovy Chat Privacy Policy

Last updated: September 1, 2026

Introduction

This Privacy Policy explains what personal data we collect in connection with your use of Klovy Chat, for what purposes and on what legal basis we process it, with whom it may be entrusted, and what rights you have. This document is for informational purposes only and does not constitute an agreement – the rules governing the use of the service are set out separately in the Terms of Service. We encourage you to read the following information carefully.

Who We Are

Klovy Chat is operated by Jakub Maksymowicz, residing in Poland. The Administrator is responsible for how and why your personal data is processed within the meaning of Regulation (EU) 2016/679 of the European Parliament and of the Council (GDPR).

What Data We Collect and Why

We collect only the data necessary to properly provide the service:

- **Account data:** During registration, we collect your encrypted password and the username you choose.
- **Content and communication:** In order to provide the service, we store messages you send and other content you publish on the platform. Attachments are stored in Cloudflare R2 (see the section “How Long We Retain Your Data”).
- **Groups:** If you create or join groups within Klovy Chat, we store their names and basic configuration data necessary for the service to operate.
- **Session security:** To protect your account and prevent unauthorized access, we store the IP address and basic device information for each active session.
- **Cookies and similar technologies:** Klovy Chat uses necessary cookies (or similar mechanisms stored locally in the browser) to maintain the login session and ensure the proper operation of the service. We do not use cookies for advertising purposes or to track you across other services. Details are described in the “Cookies” section below.

Cookies

Klovy Chat uses necessary cookies and local storage mechanisms (e.g. session tokens) that are required to log in and maintain a user session. These types of cookies do not require user consent because they are necessary for providing the service (Art. 6(1)(b) GDPR). We do not use third-party analytics or marketing cookies. If we introduce such technologies in the future, we will inform you in an updated version of this Policy and – where required – request separate consent.

Profiling and Automated Decision-Making

Klovy Chat does not use profiling or automated decision-making that produces legal effects concerning the user or similarly significantly affects the user. Your data is not used to create advertising profiles or to automatically evaluate you.

Who We Share Your Data With

We do not sell your personal data to any third parties and do not share it for advertising or marketing purposes.

In order to properly provide the service, we use external infrastructure and technology service providers. We entrust these entities with processing data only to the extent necessary to perform their functions:

- **PPHU STEFEK Stefanek Sebastian (MatHost.eu)** – provider of server infrastructure, in particular the VPS server on which the Klovy Chat backend, including the API, operates. The provider is based in Poland.
- **MongoDB, Inc. (MongoDB Atlas)** – provider of a managed database service used by Klovy Chat to store application data. MongoDB Atlas processes data to the extent necessary to provide the database service. The location where data is stored depends on the region configured for the MongoDB Atlas cluster being used.
- **Cloudflare, Inc.** – provider of network infrastructure and cloud services used by Klovy Chat, including Cloudflare Pages, a global CDN, DDoS protection, and network traffic security. In connection with handling network traffic, Cloudflare may process, among other things, IP addresses, information relating to HTTP requests, and basic technical information about the device and connection.
- **Cloudflare R2** – object storage service used to store attachments uploaded by users. Attachments are automatically deleted after a maximum of 30 days from the time they are uploaded, in accordance with the adopted retention policy.

The providers listed above process data only to the extent necessary to provide the respective services and in accordance with applicable terms of service and relevant data

processing agreements.

If the providers listed above use further subcontractors, data may be transferred to such entities only to the extent necessary to provide the respective services and in accordance with applicable data protection laws.

Your data may be disclosed to external authorities only when strictly required by applicable law, a final court judgment or a decision of a competent administrative authority, or when necessary to protect the life or health of users or to prevent serious abuse.

Data Security

We apply technical and organizational security measures appropriate to the nature of the data being processed, including:

- encryption of the connection between your device and our servers using HTTPS/TLS;
- storing passwords only in the form of hashes generated using the Argon2 algorithm, without the ability to read the password in plain text;
- restricted access to data, granted only to persons who need it to provide and maintain the service;
- continuous monitoring of the infrastructure for attempts at unauthorized access.

Despite the security measures we use, no method of transmitting or storing data on the internet is completely free from risk. We nevertheless make every effort to protect your data using the best available measures.

Where Your Data Is Stored

Klovy Chat uses infrastructure provided by several independent technology providers. Individual categories of data may therefore be processed in different locations:

- **Backend** – the Klovy Chat backend, including the API, operates on a VPS server provided by PPHU STEFEK Stefanek Sebastian (MatHost.eu).
- **Database** – Klovy Chat application data is stored using MongoDB Atlas. The physical location where the data is stored depends on the region configured for the MongoDB Atlas cluster being used.
- **Application and static resources** – the Klovy Chat frontend and static application resources are delivered through Cloudflare Pages and Cloudflare's global network. Due to the use of Cloudflare's global infrastructure, user requests may be handled by servers located in different locations around the world.

- **Attachments** – files uploaded by users are stored using Cloudflare R2. Files are subject to Klovly Chat’s retention policy and are automatically deleted after a maximum of 30 days from the time they are uploaded.

We make efforts to ensure that data is processed in locations providing an appropriate level of personal data protection. Where the use of our providers’ services results in data being processed outside the European Economic Area, such processing is carried out on the basis of appropriate mechanisms provided for by applicable data protection laws, in particular standard contractual clauses or other legally permitted data transfer mechanisms.

Due to the use of global infrastructure providers such as Cloudflare and MongoDB, we cannot guarantee that every technical operation related to the provision of the service will be performed exclusively within Poland. The scope and location of such processing depend on the configuration of the services, data regions, and infrastructure of the individual providers.

If you wish to submit a request to delete your data, including under the GDPR, use the account deletion option available in the application or contact us at the address provided in the “Contact” section.

Users Outside the European Union

Klovly Chat is a globally available service. If you use our platform outside the European Union, your data may be processed and stored within the EU, which means that it is subject to European data protection laws.

We make efforts to ensure that the level of protection of your data complies with the GDPR regardless of your location. If the laws applicable in your country grant you additional data protection rights, you may exercise them by contacting us.

Privacy Protection for Children and Minors

Klovly Chat is not intended for children under 13 years of age. We do not knowingly collect personal data from persons under this age. Users between 13 and 17 years of age may use the service only with the consent of a parent or legal guardian, in accordance with the requirements of the GDPR.

If you are a parent or guardian and have reason to believe that your child has provided us with their data without the required consent, please contact us immediately. Once such a situation is confirmed, we will delete the child’s data without undue delay. Minor users may also be reported using the reporting feature available in the application.

Your Rights

Regardless of your location, as a Klovly Chat user you have the following rights:

- **Right of access** – you may request a copy of the personal data we store about you.
- **Right to rectification** – you may request that inaccurate or incomplete data be corrected.
- **Right to erasure** – you may request the deletion of your data, subject to legal obligations that may require us to retain it.
- **Right to restriction of processing** – you may request that the processing of your data be restricted in certain circumstances.
- **Right to data portability** – you may receive your data in a structured, commonly used, machine-readable format.
- **Right to object** – you may object to the processing of your data for certain purposes.
- **Right to withdraw consent** – to the extent that processing is based on consent, you may withdraw that consent at any time, without affecting the lawfulness of processing carried out before the withdrawal.

To exercise any of the rights listed above, contact us at the address provided in the “Contact” section. We will endeavor to respond without undue delay, no later than within 30 days.

If you believe that we process your data unlawfully, you have the right to lodge a complaint with the President of the Personal Data Protection Office (UODO) – the Polish supervisory authority for personal data protection, which is also competent for users from other EEA countries with regard to activities carried out by the Administrator.

Legal Basis for Data Processing

We process your personal data on the following legal bases:

- **Performance of a contract (Art. 6(1)(b) GDPR)** – processing of account data, content and communication, and group data necessary to create an account and provide Klovly Chat services to you. Without processing this data, providing the service would not be possible.
- **Legitimate interest of the Administrator (Art. 6(1)(f) GDPR)** – ensuring platform security, protection against abuse, and prevention of unauthorized access, including the processing of IP addresses and session data.
- **Legal obligation (Art. 6(1)(c) GDPR)** – where processing is required by applicable law.

- **Consent (Art. 6(1)(a) GDPR)** – to the extent that we introduce features in the future that require separate consent (e.g. additional analytics or marketing cookies), consent will be obtained separately before such processing begins.

How Long We Retain Your Data

The retention period depends on the type of data:

- **Account data (username, encrypted password):** stored for the entire lifetime of the account and deleted without undue delay after permanent account deletion, except for information that must be retained under applicable law.
- **Messages (text content):** are not automatically deleted after 30 days – this period applies to session data, IP addresses, and system logs, not to message content. Messages are stored until they are manually deleted by the user, the user leaves or the group is deleted, or the account is permanently deleted.
- **Attachments:** stored using Cloudflare R2 and automatically deleted after a maximum of 30 days from the time they are uploaded, in accordance with the configured retention policy of that service.
- **Session security data (IP address, device information):** stored for the duration of the session and, after the session ends, for a maximum of 30 days, after which they are permanently deleted.
- **System logs and infrastructure security data:** stored for a maximum of 30 days and then permanently deleted, unless longer retention is necessary to investigate a security incident.
- **Data processed by Cloudflare (e.g. network traffic logs, IP addresses used for DDoS protection):** retained for the period resulting from the retention policies applied by Cloudflare for network security purposes, independently of the periods specified above.

Changes to the Privacy Policy

We may update this Privacy Policy as the service develops or applicable laws change. We will inform you in advance of any significant changes by publishing an update notice on the klovychat homepage or by making the updated Policy available together with the date of its latest modification. Changes take effect on the date specified with each update.

We encourage you to review this Policy periodically to stay informed about any changes.

Contact

If you have any questions regarding this Privacy Policy, the processing of your personal data, or the exercise of your rights, you may contact the data Administrator:

E-mail: kontakt@klovy.chat

Mailing address:

ul. Augustyna Szamarzewskiego 21 lok. 2
60-514 Poznań
Poland

We will endeavor to respond to every inquiry without undue delay, no later than within 30 days of receiving it.
